

Request to Operate Aircraft Weighing over 12,500 lbs. at Wings Field

Wings Field operates as a general aviation “utility” type airport, accommodating single- and twin-engine aircraft having a maximum takeoff weight of 12,500 lbs. or less and an approach speed of less than 121 knots. Wings is also a noise sensitive airport continuously striving to be a good neighbor to its surrounding communities. In addition to complying with all applicable FAA regulations, pilots are requested to comply with, safety permitting, *Wings Field’s Noise Abatement Procedures*.

Name of Firm/Individual (Operator)

Address _____ City _____ State _____ ZIP Code _____

Chief Pilot _____ Telephone No. _____ Fax No. _____ E-Mail Address _____

Information about the aircraft weighing over 12,500 lbs. you plan to operate into Wings Field

Aircraft Type _____ N# _____ Serial # _____ MTOGW _____ lbs. Noise Stage _____

I hereby request permission to operate the above aircraft into Wings Field. I will comply with the **voluntary** *Wings Field Noise Abatement Procedures*. I understand that such permission is subject to the following terms:

1. **Voluntary Restraints for Aircraft:** All operators are requested to comply with voluntary constraints from flying aircraft from 11:00 PM to 6:00 AM local time. Turbine-powered aircraft should follow NBAA noise abatement approach and landing procedures.
2. As with all operations of aircraft on short runways, operators and their pilots should carefully consider the operating limitations of their aircraft, balanced field length requirements, braking capabilities, etc.
3. All operations conducted shall be subject to all Federal Aviation Administration (FAA) rules, regulations and/or procedures. These procedures are not intended to preempt the responsibilities of the pilot-in-command for safe aircraft operations. Recommended procedures are not intended to conflict with instructions from ATC or those that are the exclusive authority of the FAA.
4. No operations of Stage I aircraft are permitted.
5. No aircraft that weighs in excess of 22,000 lb MTOGW may operate on any of the paved surfaces at Wings Field.

I have read the **voluntary** *Wings Field Noise Abatement Procedures*, reviewed the airport’s recommended procedures with my pilots, and will do everything possible to fly safely and be a responsible neighbor for the Wings community. When completed and signed, please fax this form to 215.646.4437.
